

## Team 23 Individual Statement

Story Cards- This task is a document explaining how the functions of various clients have been met. Also, it explains how they have been used on the website. For example, there are various inputs such as Register and Login. This must be in a pdf format and uploaded within a 'Documentation' folder in GitHub. 10

Meeting Minutes- This task entails that weekly meeting minutes are produced. Areas of discussion include team activity, illustrating planning, tasks, and task allocation. This must be uploaded within a 'Minutes' folder in GitHub. 10

Reflection on Legal, Social, Ethical and Political issues- This is a document explaining how these issues relate to our website code. 10

Code- This is the software project created for political change. It is a website used to raise money and awareness for various issues. 10

Code inspection reports- This is just an analysis of the code. Here we show the code produced and explain it as clearly as possible. This is an extension to the Acceptance testing document. 10

Acceptance testing document- A document produced to simplify and help further explain the functionality of the code we have produced. 10

Contributions- The grading scale that I will use to measure my teams' contributions will be a numbered one ranging from 1 to 10. With 1 being the least amount of effort and 10 being the most. The number at the end of each explanation will represent its contribution by the team. Also I will show each member's level of contribution towards the entire project. 10

Faisal Hussain: 10

Muaaz Hussain: 10

Mudasser Ijaz: 10

Noor Ilahi: 10

Uzair Khan: 10
